Abdelmajid2000 Abdelmajid2000 Team Dec 4, 2010 4 A good tool for downloading videos

Downloaded this tool for one purpose only - downloading videos. It works pretty well, but the only negative comment I have for it is that the site its built for is pretty slow and not well maintained. So when you get to the point where the video you want to download is a couple of hours long, you will have to wait. I have a feeling that the reason for this is that the guys who built this tool are good coders and they wanted something more than a one day project to do. But if you do download a file and it breaks down or does not download and you have to download it again, it will take a lot of time to try and do it. I have a feeling it could be better if its a one day project and not something that will

last for years. I personally do not see the need for a video downloader unless you have a very slow computer. You can use a YouTube downloader if you have a fast computer and dont want to wait several hours for a video to download. James Carter James Carter Team Mar 20, 2010 4 Maybe the one and only downloader with searching capability This is a very good video downloader/player. I've been using it for some time now. I like the layout of it. It is in that "stand alone" program fashion as opposed to the other browser programs I've seen, which seem to be attached to an HTML/web browser. I've tried other programs such as one that supposedly does video searching as well and they seem more bulky. This program is only as bulky as you want it to be. The easy to use interface and layout make it a cut above the rest. The best thing about this program is that it does both searching and downloading. This is the one program I've seen that can do both. I've used other programs that are one and only downloaders and they seem to do downloading only. The thing is that

it downloads pretty fast. It is a downloader, but it also serves as a downloader. Has to be updated The only thing that this site does not like about it is that the "Download" button does
