Compose fantasy or
romance novels The
app is wrapped in a
modern and well-

organized interface, divided into numerous individual tabs (e.g. outline, script, notes, characters), a word processor and the chapter panel. A standard toolbar stacks the most important functions

that can be accessed
with one click. Take
your time to get
familiarized with the
options It's
recommended to take
the tool for a spin and
learn its features in
order to save up time.
Right from the

beginning, the app offers a quick overview of each function. It's best to start by drafting the outlines of the story to know what you need to achieve.

Create the story outlines To add a new outline, simply press

the "+" button and input your ideas. All the summaries can be viewed in the panel on the left. In the "Script" tab, you can structure each step that needs to be followed. The formatting tools help you customize and

arrange the text in the page. Make annotations and enter information about each protagonist. Movie Outline lets you make personal notes with additions or changes. The app offers a character profile

wizard, which guides you through several steps to add the data about each protagonist. Among the fields you can fill in are full name, age, gender, marital status, children, religion and education, as well as

flaws, life ambition,
relationships,
biography and arcs.
Unique color scheme
to differentiate each
stage The "PowerView"
feature enables you to
divide the story into
distinct sections and
sub-sections (chapter,

actor, location), and highlight them with individual colors. Plus, you can use the "Auto-complete" function to automatically format your content as you type. Structure the natural order of chapters In the " Step

Cards" menu, you
have the option to
organize the stages by
