A: I see that you're trying to get it to print out the first ' ' characters (newlines) within the code section, but you're not allowing the input to be split into lines, because you're only accepting input as one line. Try changing while (std::cin) { to while (std::getline(std::cin, variable)) { Also, instead of trying to split the input into characters and putting those characters into an array, you should be better off using vectors and a std::istream\_iterator loop. The c++ standard library has some utilities to make this easy. std::getline(std::cin, variable); // ^^^  
std::vector tokens; std::istream\_iterator inputIterator(std::cin); std::copy(inputIterator, inputIterator + 2, std::back\_inserter(tokens)); std::vector lines; for (std::vector::const\_iterator it = tokens.begin(); it!= tokens.end(); ++it) { lines.push\_back(\*it); } The vector of lines will be sorted into your desired order. Charleston, W.Va. (OEO) – Gov. Tomblin has directed regional offices to suspend all state park visitation until further notice. W.Va. State Park officials announced the change on Twitter, saying that “State Parks are currently closed to visitation.” The state park system is a network of 90 parks and historic sites on 240,000 acres spanning the entire state. We ask that you please respect the requests of State Park officials and follow any direction they provide. – W.Va. Department of Tourism, Recreation and Economic DevelopmentThe Daily Star's FREE newsletter is spectacular! Sign up today for the best stories straight to your inbox Sign up today! Thank you for subscribing See our privacy notice Invalid Email The teenage victim was a homeless member of the public who was picked up at a shopping centre car park. The suspect, a 21-year-old man, had been sitting in his car for several hours at the centre car park in Macfarlan, Northumberland. He then approached her, got
