The Paper World is in trouble! The crystal of power was stolen from Mikoshi Temple, and the world is now in danger! To save the paper world, it's up to you to find the stolen crystal and destroy it before it's too late. You are Mikoshi, an intelligent, perky, twin-tailed girl and your best friend! You are living in the year 2146, where you and your best friend Senzo were saved by a mysterious person named Jacky who couldn't remember anything before. You used the special remote to transport them to 2015 and they've been living there ever since. In the Paper World of 2146, you can now turn all the things you touch into paper and use paper for everything! You play as Mikoshi, an energetic and lively girl! You will travel with her, Senzo and Jacky as they try to find the crystal and stop the enemies that stole it. You will travel through 12 levels and find more than five weapons, powerful abilities, cool minigames and save the world! This is a single-player game, so you can play it alone. Concept The idea of the game came from the concept of how one's environment can affect their mood, physically or mentally. One example of this is how a teenager who spends long periods of their life in front of the TV or computer screen, will become lazy and apathetic. Another example is how military and troops learn to endure harsh conditions through the years of training and conditioning that they get. It is not a matter of if, but how will the world be in the future if we take these habits into consideration. With that in mind, it was decided to make the world of 2025 the target of time traveling and with that, make the game a platformer.
